

Florencia Hidalgo

DATA ANALYST & BI DEVELOPER

Argentina | +54 9 1161918951 | hidalgoflorenciabelen@gmail.com | linkedin.com/in/florenciahi

EXPERIENCE

CHIC Realty

Data Analyst

Dec 2022 - April 2025

- Designed and maintained Power BI dashboards (daily, weekly) for sales, occupancy, and agent performance, used by Sales, Marketing, and senior management.
- Automated data refreshes with Power Query and SQL pipelines, reducing manual reporting time by 30%.
- Delivered actionable insights that accelerated pricing and sales strategy decisions, contributing to higher lead conversion and improved decision-making speed.
- Developed ad hoc reports and forecasts for executives, supporting monthly strategy reviews.
- Presented results in cross-functional meetings, translating complex data into clear business actions.
- Ensured data quality and consistency by building validation steps into ETL processes.

Marketing Playa

Web administration & Performance analysis

August 2020 - Dec 2022

- Managed multiple client websites on WordPress, improving load times, navigation, and overall search visibility.
- Conducted Google Analytics deep-dives, monitoring CTR, bounce rates, and lead generation to optimize performance.
- Built campaign performance dashboards and ROI reports, helping stakeholders adjust marketing spend.
- Ran A/B tests on landing pages and Facebook Ads campaigns, resulting in 15% growth in organic traffic and 12% improvement in conversions for selected products.
- Implemented technical SEO fixes and optimized landing pages, boosting search engine rankings.

Infodash

BI Developer

March 2023 - September 2023

- Extracted, transformed, and validated large datasets from public sources using SQL and Power Query.
- Designed interactive Power BI dashboards for stakeholders to track impact indicators and performance metrics.
- Implemented advanced DAX calculations for trend analysis and performance forecasting.
- Maintained and documented data models to ensure consistency, accuracy, and auditability (Data Modeling, Reporting Automation).

PROYECTS

ServPro Manassas (USA)

Data Analyst

Oct 2025 - Ene 2026

- Worked with HubSpot data sources, performing data cleaning, normalization, and validation to improve data quality and consistency.
- Designed and automated reporting workflows within HubSpot to support commercial and operational decision-making.
- Built and maintained dashboards and reports focused on performance tracking, lead activity, and operational metrics.
- Implemented data automation processes to reduce manual work and ensure reliable, up-to-date reporting.
- Collaborated with stakeholders to translate business needs into clear metrics and actionable insights.
